**Reason/Objective of the disposal ( to be filled by maintenance department)**

These Freezer and Chiller are market returned. They are having multiple issues of compressor breakdown, condesnor leakage, body damage in market, fan motor and filter drier in bad condition, electrical circuit leak, evaporator pipe line block. Even the overall look is also spoiled. Hence after carefully investigation and effort to repair it, We have identified that these freezer/chiller are not repairable and should be disposed off. They are currently segregated and kept in Al Cat street (11) Hence, we seek approval to sell them as scrap to free up space.

We have removed all working spare parts like compressor from them to be used as spare for repair work of other freezers/chillers. the disposable we mentioned is tentative , we will further negotiate with scrap supplier at the time of disposing off.
